

M6100 USB Flash Drive Duplicator

NEW USB Flash Drive Duplicator from the Industry Leader

Fast Reliable Versatile Stand Alone Easily Operated

Features

- Support USB 1.1 and USB 2.0
- Master may be file, Pattern, Golden Master
- Single or multiple chassis (slices)
- 12 thru 36 desk mount version
- Fast Duplication with overlapping parallel operations performed
- Binary Image Copy allows the copy process to be independent of the operating system.
- Automatic sizing and size checking of the master and copy cards
- Single button execution for Stand Alone Operation
- Linux GUI with quick setup, single button execution
- Service Bureau Functions including a report generator and log file
- Network Connectivity thru 10/100 Ethernet

M6100 USB Flash Drive Duplicator

High Speed Production Duplication of USB Flash Drive

The M6100 is a Suse Linux based USB flash drive duplicator and is powered by Pentium IV. It uses either a master USB device in socket 1 or a master file when duplicating. Operation is either thru a single display/switch on the M6100 front panel or thru a standard terminal and keyboard. TCL scripts and a user-friendly GUI make the duplication process a simple procedure.

Three sections are easily connected together to maximize the throughput. The sections are networked together using a high speed multi-port Ethernet switch so that all sections may share a common control window. Once a duplication job is launched in the user friendly GUI window, each section is individually started using the sections' START Key.

Because each section is a separate computer with parallel processing of the copy and verify data to all twelve copy sockets, while any section is being unloaded and then loaded, the other two sections can be performing a copy function. This sequential operation of each section allows maximum throughput for the system.

Specifications

Copy Capacity: 12 / 24 / 36 copy slots

Linux GUI Software: Included

Display: 24 x 2 Back_lit LCD

Power Supply: 200W 115V/230V SPS

Keypad: Start, Select, Escape, Power

Dimensions: 17"x15.5"x3.5"

Computer Interface: 10/100 Ethernet

Weight: 15 lbs (7 Kg)

System Part Number and Description

M6100-USB-12 USB Duplicator with 12 slots

M6100-USB-24 USB Duplicator with 24 slots and M61-CAB-3

M6100-USB-36 USB Duplicator with 36 slots and M61-CAB-3
